

ACE Award

Acknowledging Commitment and Excellence

CERTIFICATE OF APPRECIATION

Hemachandra Prasad VELIVELA

On Winning the ACE Award

This ACE award is for your extraordinary work in coming up with the 3D API for duct bank run creation, routing and modification workflows. This is long pending request from many customers and also needed for implementing duct bank functionality in Smart3Dx. This is quite complex work but you have thoroughly analyzed various use cases involved, went through various design discussions and reviews before coming up with a complete solution for all cases. You have converted around 6000 LOC from VB6 to CPP as a part of this effort. Congratulations Hema, great work done!!
